CAREER OVERVIEW

AWS Certified DevOps Engineer professional having 4 years of experience and expertise in Deployments & Cloud Infrastructure Automation. Proficient in open-source DevOps tools as well as Proprietary DevOps Tools. Worked with & led teams, helping them to achieve faster release time and solid Cloud Infrastructure.

WORK EXPERIENCE

Infosys Limited: Associate Consultant

Client: Capital Group Companies

Apr 2019 – Present

Role: DevOps Engineer

- Administration of Atlassian and Digital AI (XebiaLabs) tools.
- Collaborated with Development teams to provide them support to create/configure projects and CI/CD pipelines.
- Troubleshooting the CI/CD issues and issues related to other supported tools.
- Managed an 18-member cross-functional (operation support and development) team and coordinated with clients to achieve successful production deployments.
- Automated the creation of CI/CD pipelines using configuration as code for Bamboo and XL Deploy which helped in the reduction of 25% of manual work.
- Bringing new ideas and implementing them in terms of value-adds or process improvement.
- Actively gave demonstrations about the enhancements/updates made in the automation process to the client in the sprint meetings.
- Ability to work efficiently in both independent and team work environments.

Client: Bayerische Motoren Werke (BMW)

Oct 2018 – Mar 2019

Role: Web Operations Engineer

- Provisioning of new application rooms for web-servers and application-servers.
- Troubleshooting and resolving the issues with proper RCA and within the SLA.
- Performed de-activation and de-commissioning of servers.
- Performed Activation and Go-Live session of servers.
- Resolved incident tickets of all priorities and handled change requests.
